

Literature Review

Write an 8-10 page literature review on a topic pertinent to infancy. Your review should summarize the literature (a minimum of 6 empirical, peer-reviewed references) This topic may or may not be related to one of the issues covered in class, however you must only cite studies that were *not* discussed in class. Feel free to schedule a meeting with me for feedback on ideas or drafts.

The format of the paper should be double-spaced, 12-point font, with one-inch margins, and pages numbered at the top right of each page. Papers should be stapled. Papers must conform to APA format (as described in the APA Publication Manual). For information on APA format, see this useful website:
